CORPORATE PROFILE

CPM / Roskamp Champion / Beta raven / Century Extrusion / Wolverine Proctor, are companies owned by Gilbert Global Equity Partners

The company's reputation was earned from the earliest days, in 1883, the founders, Toulouse and Delorieux, began manufacturing presses, crushers and stemmers to process grapes into wine. Production was expanded to include equipment for processing olives, cider and macaroni. Some early machines are still in use today.

Around the turn of the 20 century, Toulouse and Delorieux developed equipment to make fish oil and fish meal, marking the company's first entry into the feed processing business. The company also expanded from manufacturing individual machines to designing and building complete fish processing plants. The success of these plants encouraged our systems approach to feed processing.

In 1931, the company then known as California Press Manufacturing Company revolutionized the feed processing industry with the introduction of the first commercially 30-horsepower pelletmill. CPM now makes pelletmills that are more than 25 times as powerful.

Today CPM stands for a group of companies including Roskamp Champion with a wide range of machinery for crushing, grinding, densifying, cooling, drying and sifting.

CPM / Roskamp Champion, has a worldwide reputation as a pelleting specialist, a leader in densifying technology by means of pelleting.

CPM is well known not only in the animal feed industry but also in the chemical- and recycling business. CPM pellet mills and other equipment are used all over the world. The combination of these companies isn't merely a supplier of machines, but a supplier of know how, technology and experience. In cooperation with the customer, we can very often save considerable costs for YOU. These savings can be reached in energy, wearing parts, less rejected product and less return during the production.

CPM backs all this knowledge up with an extensive stock of genuine parts, at competitive prices.

CPM/EUROPE B.V. AMSTERDAM-THE NETHERLANDS

APPLICATIONS IN:

- Animal feed industry
- Flour milling industry
- Food industry
- Oil seed industry
- Grain processing industry
- Bio energy industry
- Wood waste industry
- Waste recycling industry
- Aqua feed industry
- Pet food industry
- Chemical industry
- Pharmaceutical industry
- Plastic industry
- Sugar beet / cane industry
- Tapioca Industry
- Grass / Lucerne industry
- And various other kind of industries

EQUIPMENT SUPPLY:

- Pellet mills
- Conditioner systems
- Cooling installations
- Crumblers
- Sifters
- Hammer mills
- Roller mills
- Flaking mills
- Liquid addition systems
- Heat treatment systems
- Wood pelleting systems
- Waste pelleting systems

CPM Europe b.v., based in Amsterdam, The Netherlands, is the world's leading supplier of process equipment and controls to the animal feed and oilseed processing industries. It supplies its machinery and parts throughout Europe, Middle East and Africa. The company's products are sold under the California Pellet Mill, Roskamp Champion, and Beta Raven brands.

CPM is also a leading equipment supplier to numerous industries such as waste, pet food, aquaculture and food processing industries. The company's products are also well-suited for applications in pharmaceutical, chemical, wood and plastics industries. Through CPM's dedicated, capable engineering and application knowledge, CPM products serve many non-traditional applications where customers find value in our lowest total operating cost solutions.

CPM equipment is designed for the most demanding applications, CPM produces hammer mills, pellet mills, roller mills, crumblers, sifters, screeners, and flaking mills that set the industry standard for operational efficiency and quality.

CPM has a global network of representatives ready to support sales with world-class service, parts, and operating knowledge.

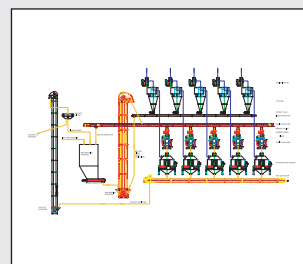

CPM has established an impeccable reputation; we offer exceptional equipment, outstanding support, and deliver outstanding value to our customer applications.
